***How to Reduce Doctoral Thesis Binding Costs** (June 2026)

[Binding Process]

1. Purchase blank A4 paper.
2. Print the main text using university printers. (Free of charge)
3. Bring the printed text directly to a print and binding shop (e.g., Kinko's). (Walk-ins were welcome without a reservation.)

https://www.kinkos.co.jp/store/kyoto/ky001/?utm_source=google&utm_medium=my_business&utm_campaign=top

4. Request cover creation and binding. The finished copies will be ready for pickup in about an hour.

[Estimated Cost]

Approx. 6,200 yen for 5 copies

✂The price varies depending on the number of pages

By using this method, the student was able to reduce the binding expenses by roughly half. Hope this information proves useful to you all.
